

<http://www.biorestec.com/>

The 1st International Conference on Bioresource Technology for Bioenergy, Bioproducts & Environmental Sustainability in association with Elsevier's premier journal "Bioresource Technology", aims to provide a shared forum for researchers, academics, industry, and policymakers, to discuss the current state of the art and emerging trends in biotechnology, bioenergy, and biobased products.

The programme will be curated by a committee of world class academic leaders in their respective fields with key topic areas including:

The conference will include:

- Bioresources- pretreatment/de-construction
- Bioresources (including waste) - resource recovery and recycling
- Bioresources for biofuels (liquid and gaseous)
- Bioresources for biobased chemicals & products
- Bioresources- Thermochemical conversion
- Biorefineries and white biotechnology
- Systems approach [bioresource systems analysis, life cycle assessment (LCA), carbon accounting
- Industrial applications and up-scaling
- Bioresource policy & economics

Supporting Publications

Bioresource Technology publishes original articles, review articles, case studies and short communications on the fundamentals, applications and management of bioresource technology.

The journal's aim is to advance and disseminate knowledge in all the related areas of biomass, biological waste treatment, bioenergy, biotransformations and bioresource systems analysis, and technologies associated with conversion or production.

Conference Deadlines

| Category | Date |
|------------------------------|------------------|
| Abstract submission deadline | 3 June 2016 |
| Early registration deadline | 5 September 2016 |
